

2011 U.S. ENERGY EFFICIENCY TAX CREDIT

Future Roof Inc is proud to offer a Roofing System, which is an “eligible building envelope component” that qualifies for a Federal Tax Credit, as extended in the “Emergency Economic Stabilization Act of 2008.

Up to \$500.00USD

This Federal Tax Credit is applicable for a Future Roof® System that is installed on a structure between January 1, 2006 and December 31, 2011.

The Future Roof System meets the following qualifications, as stated in the Act of 2008:

- i. appropriate pigmented coatings that are specifically and primarily designed to reduce the heat gain of a dwelling unit when installed on the dwelling unit
- ii. meets or exceeds ENERGY STAR® program requirements for steep slope roofs greater than 2:12 (as in affect at the time of installation), as in accordance with IRS Notice 2006-26

The Future Roof System must be installed on the taxpayer’s occupied principal residence, located in the United States. For further details log on to <http://www.treasury.gov/initiatives/eesa/>

Show this certificate to your tax preparer. Your credit could be up to 30% of the purchase price of your roof, to a maximum of \$500.00 USD. Keep all documents of the purchase of your Future Roof System and a copy of this document for reference.

Manufacture: Future Roof Inc.

A handwritten signature in black ink that reads "J.T. Brown".
